Snapping Receipts

1 day ago • Updated

Use the Fetch Rewards Snap tool to snap a photo of your physical, paper receipts after you make a purchase, and get the rewards that you deserve.

1. Tap the  **Snap button** at the bottom of the Home screen.
2. Tap the **Snap button** again, selecting the option to snap a physical receipt.
3. Adjust your receipt to fit within the viewfinder, ensuring to include the store name, total spent, and date of purchase in frame.

4. Tap the **Snap button** to scan your receipt.
5. Check to make sure that the snap has captured the store, total, and date, as indicated by the green confirmation bubbles.
6. Tap the **Submit button** in the bottom right corner, and collect your rewards!

Tip: If the entirety of the receipt does not fit in one image and information is missing, you can take multiple snaps until you capture all the necessary information on the receipt. Try to limit overlap to two lines.
