Turning on Location Services

Location Services uses the location of your phone to determine which breweries are near you, so you can decide where to start your next tab.

Turn on your Location Services to get started now.

How to tell if your Location Services are on

When in the Arryved Mobile app, you can easily determine the status of your Location Services by navigating to the **Location List** from the main menu.

If prompted to turn on your Location Services, then your Location Services are currently **off**. If provided a list of local breweries and taprooms, then your Location Services are already **on**, and you're good to go!
