Setting your Wallet PIN

Before adding a new payment method, you'll be asked to set a Wallet PIN. Your Wallet PIN is a 4 to 6 digit code that serves as a secondary security measure, in case your thumbprint or Face ID are unavailable.

Follow these steps to set your Wallet PIN.

1. Enter a 4 to 6 digit PIN in the text field provided.
2. Confirm your 4 to 6 digit PIN.
3. Tap the **Set PIN** button.

Resetting your Wallet PIN

At any point, you can reset your Wallet PIN. For security reasons, resetting your Wallet PIN will remove all stored credit and debit cards from your wallet.

Follow these steps to reset your Wallet PIN.

1. Tap on **Reset Wallet PIN...**
2. Tap on the **Reset Wallet PIN** button.

Adding a New Credit or Debit Card

After setting your Wallet PIN, you can add a new credit or
debit card to your wallet.

Follow these steps to add a new credit or debit card to your
wallet.

1. Tap **Add New Card...**

2. Enter your card information in the text fields provided.
3. Tap the **Add Card** button.

‹   **Add Credit Card**

Credit Card Number

Name (as shown on card)

CVV (3 digits on back of card)

Card Expiration (MM/YY)

Billing Zip Code

Selecting a Default Card

If adding multiple cards, you will have the option to set one of these cards as your **Default Card**. All payments will be conducted with your **Default Card** until you promote another card to become the default.

Note: If you do not select a **Default Card**, the first card you add will automatically become the default.

Follow these steps to promote a card to become your **Default Card**.

1. Tap on the card that you would like to become your default.
2. Tap on the **Make Default** button.

Removing a Card from your Wallet

After adding a credit or debit card, you can remove a card from your wallet at any point you like.

Follow these steps to remove a card from your wallet.

1. Tap on the card that you want to remove from your wallet.
2. Tap the **Delete Card** button.
